Hello,

I am excited to apply for the software engineering position at Gusto. With over 3 years of experience in full stack development and a passion for creating user-friendly applications, I am confident in my ability to contribute to your team. My experience includes developing and maintaining applications using React, Java Spring, and PostgreSQL, as well as containerizing applications with Docker and deploying them on AWS.

At SSTEK Savunma Sanayi Teknolojileri, I led the development of Yapı Kazan, a commercial full stack application, where I focused on building scalable backend services and a responsive frontend. I am skilled in data modeling and have a strong interest in solving complex product development problems. I am excited about the opportunity to work at Gusto, where I can help build products that enhance customers' financial wellness and create memorable experiences.

Thank you for considering my application. I look forward to the possibility of discussing how my background, skills, and enthusiasm align with the needs of your team.

Sincerely,

Serhat Gürgenyatağı
